2. Perform basic Image Handling and processing operations on the image is to read an image in python and Convert an Image to Blur using Gaussian Blur

code;

```
import cv2
import matplotlib.pyplot as plt

# Read the image
img = cv2.imread(r"C:\Users\ROHIT\Downloads\WhatsApp Image 2026-04-22 at 9.46.01 AM.jpeg")

if img is None:
    print("Error: Image not found!")
else:
    # Convert image to grayscale
    gray = cv2.cvtColor(img, cv2.COLOR_BGR2GRAY)

    # Detect edges using Canny
    edges = cv2.Canny(gray, 100, 200)

    # Display original and outline images
    plt.subplot(1, 2, 1)
    plt.imshow(cv2.cvtColor(img, cv2.COLOR_BGR2RGB))
    plt.title("Original Image")
    plt.axis("off")

    plt.subplot(1, 2, 2)
    plt.imshow(edges, cmap="gray")
    plt.title("Canny Edge Detection")
    plt.axis("off")

    plt.show()
```

output
